

USA STUDENT-RUN FREE CLINIC

IMPACT REPORT 2021

WHAT'S NEW AT THE CLINIC

This year, we re-opened our doors on April 23, 2021. Due to the ongoing pandemic we only saw the residents of the Salvation Army. Despite not opening to the public, we were able to expand our services by hosting Patient Education to the residents of Salvation Army every Friday afternoon before clinic. This helped the volunteers to make personal connections before seeing the residents at clinic. Patient education is led by our board members and student volunteers. Each week, an educational topic is taught followed by an activity. These topics ranged from stress management, hygiene, and practicing mindfulness.
